Research Title: Investigating the effectiveness of restorative practices in schools

In April, you completed a questionnaire about your experiences at school, your well-being, and your views of your school. Thank you very much for doing this. We would now like you to fill in a similar questionnaire to find out whether things have stayed the same or changed for you over the last 6-7 months. This information is being collected as part of a research study aimed at investigating the effects of restorative practices on students' behaviour and their sense of feeling connected to their school. The study is being conducted by two independent researchers from the University of Southampton.

All of your answers on this survey will be treated as confidential so please be as honest as possible. Your identity will be protected and your answers will not be shown to your teachers, except in the event that the researchers feel that the information you have provided raises concerns about your safety or well-being or that of other students at your school.

PART 2: THE BELONGING SCALE

Please read each of the 12 statements below carefully and try to decide how much you agree or disagree with each of them. **You should put a tick in the middle box if you are not sure.**

Remember, there are no right or wrong answers.

Questions		No, not true	Not sure	Yes, true
		1	2	3
1	I feel really happy at this school.			
2	People here notice when I am good at something.			
3	It is hard for people like me to feel happy here.			
4	Most teachers at my school like me.			
5	Sometimes I feel as if I shouldn't be at this school.			
6	There is an adult in school who I can talk to about my problems.			
7	People at this school are friendly to me.			
8	Teachers here don't like people like me.			
9	I feel very different from most other kids here.			
10	I wish I were in a different school.			
11	I feel happy being at my school.			
12	Other kids here like me the way I am.			

The belonging scale. This is an adapted version of the Psychological Sense of School Membership (PSSM) Scale (Goodenow, 1993), which has been reduced from 18 to 12 items, anglicised, and simplified for use with children as young as eight years of age (Frederickson et al., 2007).

PART 4: SENSE OF SCHOOL COMMUNITY SCALE

Please read each of the 38 statements on the following pages carefully and try to decide how much you disagree or agree with each statement. **You have five choices, ranging from 'Disagree a lot' to 'Agree a lot'.**

Remember, there are no right or wrong answers.

The sense of school community scale (primary) was developed by Battistich et al. (1995) and first used with children aged 8-11 years in the Child Development Project in the United States of America. It consists of 38 items organised into three subscales: classroom supportiveness - 14 items; school supportiveness - 14 items; classroom autonomy - 10 items.
