Training Programme:

Empowering Teachers to Foster Emotional and Motivational Well-being in the Classroom

By: Dr Scott Ighavongbe-Patrick CPsychol

Introduction

In my role as a Senior Educational Psychologist at Buckinghamshire Council, I am uniquely positioned to catalyse impactful change within our educational landscape. My overarching goal is to convert schools into nurturing havens where every young mind can flourish, both emotionally and academically. Acknowledging the significant obstacles that Social, Emotional, and Mental Health (SEMH) issues can present, I am committed to arming teachers with not just knowledge, but practical tools. These tools, grounded in a fusion of Personal Construct Psychology and Tomkins' Theory of Affect Script, will enable educators to transform classrooms into trusted spaces defined by mutual respect. My upcoming 30-minute video training programme is designed to be not just informative but also invigorating and profoundly impactful. By simplifying complex theories into actionable insights, this initiative will inspire educators to become the proactive champions of emotional and intellectual growth that our children so urgently require.

Training Programme: Empowering Teachers to Foster Emotional and Motivational Well-being in the Classroom

***Introduction* (3 minutes)**

Welcome and Overview: Briefly outline the goals and importance of the training.
Why Motivation Matters: Discuss the role of motivation in educational settings.

***Understanding the Psychological Theories* (10 minutes)**
Personal Construct Psychology: Explain how our perceptions shape our experiences and can impact motivation.
Self-Determination Theory: Delve into the role of autonomy, competence, and relatedness in motivation.
Theories of Resilience: Discuss how resilience fosters a positive learning environment.
Affect Script Theory: Introduce Tompkins' theory and its role in shaping emotional responses that influence motivation.

***The Role of the Environment* (5 minutes)**
The Crushing Impact of Negative Environments: Discuss how not nurturing motivation can have detrimental effects on both teachers and students.

***Practical Frameworks for the Classroom* (7 minutes)**
Nathanson's Compass of Shame: Explain how understanding the compass can help manage classroom dynamics.
Social Discipline Window: Introduce this framework for balancing control and support in the classroom.

***Actionable Strategies* (3 minutes)**
The Teacher's Toolkit: Provide concrete strategies based on the discussed theories and frameworks for enhancing a motivational learning environment.

***Conclusion and Q&A* (2 minutes)**

Summing Up: Reiterate the importance of understanding these theories and frameworks for teaching success.

Q&A: Open the floor for any questions.

Introduction (3 minutes)

Welcome and Overview (1 minute)

Script

Hello, fabulous educators! I am thrilled to be your guide on this transformative journey. Today, we are diving into the world of psychology to empower you to become the change-makers our children so desperately need. Are you excited? Because I am!

Doodley Video Elements

- Cartoon character waving hello
- Flashing text: "Empowering Teachers!"
- Background: Classroom setup with motivational quotes on the chalkboard

Why Motivation Matters (2 minutes)

Script

Before we dive in, let us talk about why motivation is our keyword today. Motivation is the fuel that powers the engine of learning. It is what keeps us going even when the going gets tough. When we nurture motivation, we light up not just classrooms but lives. But here is the thing - motivation does not grow on trees! It's something we, as educators, have the privilege and responsibility to nurture."

Doodley Video Elements

- Animated engine revving up with text: "Motivation Fuels Learning!"
- Flashing images: Happy children learning, a teacher giving a thumbs up
- Cartoon tree with the word "Motivation" not growing on it but appearing as sunshine instead.

Part 2: Foundations of Human Motivation (5 minutes)

Introduction to Personal Construct Psychology (1.5 minutes)

Script:

Let us talk about how we see the world. Imagine you are an artist, and your canvas is reality. Personal Construct Psychology, developed by George Kelly, tells us that we are all artists in our own right. We paint the world with our unique colours, interpreting situations and people through our own lenses.

Doodley Video Elements

- Cartoon character with an artist's palette, painting a canvas.
- Key text: "We're All Artists of Our Reality."

Introduction to Self-Determination Theory (1.5 minutes)

Script:

Moving on, let us chat about why some students are always 'up for it,' while others need a nudge. Ever heard of Self-Determination Theory? This amazing framework by Deci and Ryan talks about three innate psychological needs: competence, autonomy, and relatedness. Tick these boxes, and you have got yourself a motivated class!

Doodley Video Elements:

- Animated tick boxes with text: "Competence, Autonomy, Relatedness"
- Animated kids jumping up, one with a light bulb over their head, indicating motivation.

Introduction to Theories of Resilience (2 minutes)

Script:

Now, we all know life is not a smooth sail; it is more like a rollercoaster ride. That is why understanding resilience is crucial. Resilience is not about avoiding difficulties; it is about bouncing back stronger. Theories of resilience teach us how to instil this superpower in our students!

Doodley Video Elements:

- Animated roller coaster with ups and downs, and a happy face at the end
- Key text: "Bounce Back Stronger"

Part 3: The Emotional Landscape - Affect Script and Shame (5 minutes)

The Power of Affect Script (1.5 minutes)

Script:

Okay, folks, let us switch gears and focus on our emotional GPS, shall we? Sylvan Tompkins gave us the fantastic Theory of Affect Script. This theory helps us understand how emotional 'scripts' shape our feelings and reactions. Picture these scripts as the director's cut for a movie, and you are the star. The better we understand them, the more control we have over our performance.

Doodley Video Elements:

- Animated clapperboard opening to reveal emotional faces.
- Key text: "You're the Star of Your Emotional Movie."

The Heavy Monster of Shame (1.5 minutes)

Script:

All right, let us talk about a difficult yet powerful emotion: shame. No, not the kind you feel when you spill coffee on your shirt, but the kind that feels like a monster sitting on your shoulder. Donald Nathanson expanded on Affect Theory with his Compass of Shame, mapping out how we typically react to shame. Knowing this can help us and our students turn that monster into a mere whisper.

Doodley Video Elements:

- Animated monster transforming into a small, harmless creature.
- Key text: "Taming the Monster of Shame."

Nathanson's Compass of Shame (2 minutes)

Script:

Picture a compass in your mind. Now, imagine each direction—North, South, East, West—as a way we respond to shame. Some of us withdraw, others attack ourselves or others, and some avoid the issue altogether. Being aware of these reactions helps us steer our emotional ship in the right direction, leading us back to the calm waters of self-compassion and understanding.

Doodley Video Elements:

- Animated compass pointing in different directions, then settling on "Self-Compassion."
- Key text: "Navigate Emotions with Compass of Shame."

Part 4: Navigating the Central Executive – The Motivational Wizard (5 minutes)

The Four Basic Rules by Sylvan Tomkins (2 minutes)

Script:

Did you know that our brain works like a magical wizard with a compass? This wizard is what we call the 'Central Executive.' Sylvan Tomkins taught us that this wizard operates on four basic rules: maximise positive emotions, minimise negative ones, let your feelings out, and express them in a healthy way. Imagine being that wizard, guiding your students toward a magical garden of learning!

Doodley Video Elements:

- Animated wizard with a compass guiding a ship through stormy and calm waters.
- Key text: "Be the Wizard of Your Classroom."

Creating a Nurturing Environment (1.5 minutes)

Script:

Environment matters! A garden cannot flourish without proper care, and neither can our students. So how do we make our classroom a nurturing garden? Simple: by understanding these four rules and applying them. This allows our students to blossom, reach for the sun, and overcome any weeds that might hinder their growth.

Doodley Video Elements:

- Animated garden blooming, transforming from barren to lush.
- Key text: "Nurture to Flourish"

Do not Just Be a Teacher, Be a Gardener! (1.5 minutes)

Script:

So, do not just think of yourself as a teacher. Think of yourself as a gardener, a motivational wizard who guides young minds towards the treasure of knowledge and away from the thorny paths of despair. Your wand? Emotional intelligence. Your spell book? Affective educational practices.

Doodley Video Elements:

- Animated teacher turning into a wizard, then a gardener, waving a wand to make a garden bloom.
- Key text: "You're a Teacher, a Wizard, and a Gardener!"

Part 5: The Weight of Shame - The Heavy Monster (5 minutes)

Understanding Shame in the Classroom (2 minutes)

Script:

Earlier we talked about motivational wizards and nurturing gardens, but what happens when our students encounter obstacles like the heavy monster of shame? Shame is no ordinary emotion; it is like a monster that can grow so big it prevents our students from seeking the joy of discovery and the thrill of learning.

Doodley Video Elements:

- Animated classroom with a shadowy monster creeping in from the corner.
- Key text: "Recognising the Weight of Shame."

The Difference Between Shame and Guilt (1 minute)

Script:

It is essential to know that shame is different from guilt. While guilt says, 'I did something bad,' shame whispers, 'I am bad.' As teachers, we must be vigilant to ensure our words and actions do not feed this monster.

Doodley Video Elements:

- Animated comparison of a 'Guilt Goblin' and a 'Shame Monster.'
- Key text: "Guilt vs Shame"

Light Up the Dark Room - Strategies to Combat Shame (2 minutes)

Script:

Switching on a light in a dark room can shrink the shame monster and lift our students out of the hole they may feel trapped in. Simple actions like showing empathy, practicing active listening, and building a culture of openness can make a massive difference in shrinking that monster.

Doodley Video Elements:

- Animated teacher holding a giant flashlight, driving away the shame monster.
- Key text: "Shrink the Monster with Empathy and Understanding."

Part 6: The Motivational Wizard – Unveil the Magical Powers Within You (5 minutes)

Introduction to the Central Executive (2 minutes)

Script:

Our brains are like magical wizards, always seeking the most incredible treasure - the joy of learning. This magical wizard is guided by the 'Central Executive,' which is built upon four basic rules to maximise our motivation towards positivity and growth.

Doodley Video Elements:

- Animated depiction of a brain wearing a wizard hat, wand in hand.
- Key text: "Meet Your Inner Wizard - The Central Executive."

The Four Magical Rules (2 minutes)

Script:

The first rule is to maximise positive affect. Like a gardener tending to beautiful flowers, this rule encourages us to cultivate positive emotions in our students. The second rule is to minimise negative affect, pulling out the weeds that overshadow our growth. The third rule urges us not to inhibit our feelings. It is like taking the lid off a boiling pot. And lastly, the fourth rule emphasises the expression of emotion. The more we encourage our students to express themselves, the more they understand their emotional landscape.

Doodley Video Elements:

- Animated garden with flowers and weeds, transforming into a boiling pot and then an art canvas.
- Key text: "The Four Magical Rules for Success"

Applying The Rules (1 minute)

Script:

As teachers, knowing these rules can give us the magic wand to navigate our students' emotional landscapes. We can use these principles to develop strategies for emotional regulation and help our students become the best version of themselves.

Doodley Video Elements:

- Animated teacher waving a wand, influencing a field of student-characters displaying various emotions.

- Key text: "Wield Your Wand Wisely."

Part 7: Navigating the Shame Compass – Pointing Towards Growth and Positivity (5 minutes)

Introduction to Nathanson's Compass of Shame (2 minutes)

Script:

Every one of us has a built-in compass, but it is not always pointing us in the right direction. Developed by Donald Nathanson, the 'Compass of Shame' explains how we might react when we are feeling shame. Trust me, understanding this compass can transform your teaching practice.

Doodley Video Elements:

- Animated spinning compass that settles on the word "Shame."
- Key text: "Compass of Shame"

The Four Corners of Shame (2 minutes)

Script:

This compass has four directions: withdrawal, avoidance, attack self, and attack others. These are often our students' go-to responses when they are feeling shame. They might pull away, try to dodge the issue, or even lash out. Knowing this can help us guide them back to a path of positivity and growth.

Doodley Video Elements:

- Animated compass with four pointers showing the four responses, each leading to animated scenarios.
- Key text: "Four Corners of Shame"

Turning Shame into a Teachable Moment (1 minute)

Script:

So, as an educator, when you notice these shame responses, it is like a cry for help. We can step in to support our students, redirecting that compass needle to point them back towards growth, resilience, and joy.

Doodley Video Elements:

- Animated teacher character adjusting the compass needle towards "Growth."
- Key text: "Turning Shame into a Teachable Moment."

Part 8: Emotional Regulation – Tools for Success (4 minutes)

Introduction to Emotional Regulation (1 minute)

Script:

By now, we have talked a lot about emotions. But knowing about them is one thing—managing them is another! Emotional regulation is the magic wand we all need.

Doodley Video Elements:

- Animated character holding a magic wand that changes sad faces to happy faces.
- Key text: "Emotional Regulation"

Strategies for Emotional Regulation (2 minutes)

Script:

Ever heard of deep breathing? Sure, it sounds simple, but it is powerful! Teaching students to take deep breaths can instantly help to calm their nervous system. And how about 'Stop, Think, Act'? This easy-to-remember mantra can be a game-changer in heated moments.

Doodley Video Elements:

- Animated students practicing deep breathing and transforming from stressed to calm.
- A stoplight with the words "Stop, Think, Act" popping up as the lights change.

Creating a Positive Environment (1 minute)

Script:

A nurturing environment is the bedrock of emotional regulation. By creating a safe space, setting clear expectations, and leading by example, we can make a significant difference. Remember, our students mirror our actions. Let us be the reflection they need!

Doodley Video Elements:

- Animated classroom transforming into a calm, inviting space.
- Teacher and students mirroring positive actions.
- Key text: "Be the Reflection They Need."

Part 9: Implementing a Holistic Learning Environment (4 minutes)

Overview (1 minute)

Script:

And here we are, the grand finale! We have been on quite a journey, haven't we? Now let us bring it all together to create a holistic learning environment that nurtures not just the mind but also the soul.

Doodley Video Elements:

- Animated recap of all sections appearing as jigsaw pieces, fitting together to reveal a glowing heart and brain.
- Key text: "Holistic Learning Environment"

Key Components (2 minutes)

Script:

A holistic learning environment is an orchestra, and you are the conductor! From resilience to emotional regulation, every theory and strategy we have covered is an instrument. When played in harmony, they create a symphony of growth and well-being for both you and your students.

Doodley Video Elements:

- Animated orchestra with each instrument labelled as a different theory or strategy.
- Animated conductor (the teacher) bringing them all into harmony.

Call to Action (1 minute)

Script:

So, pick up your baton, educators! The stage is set, and the spotlight is on you. Let us be the change-makers our children so desperately need. Together, we can redefine the future of education.

Doodley Video Elements:

- Animated spotlight on the teacher holding a baton.
- Text: "Be the Change-Maker"
- A curtain closing to signify the end, with applause and cheers.
